## CORE COMPTENCIES

We've grown our scope of capabilities over the past two decades so we can better help our customers. We started in pool repair and maintenance, which quickly expanded to pool renovations and new pool construction. While constructing pools, our clients asked us to transform their backyards into outdoor living spaces with kitchens, patios, decks, and pool houses. Then when disaster struck and hurricanes devastated our neighbors in Louisiana, clients recommended us to their family and friends affected by the storms, and we jumped into action. Customers loved Miguel's quality-first philosophy and keen attention to detail and asked to transform their backyards, so Nola Construction started doing outdoor living spaces complete with kitchens, patios, and lush landscaping. Again, when hurricanes struck Louisiana, customers entrusted Miguel and his team to help their families and friends rebuild after the storms passed. Today, NOLA Construction is more than just Miguel, and you still get that personal touch because Miguel refuses to let his crews get overwhelmed by starting too many projects at once. As the company has grown, it's become even more of a family business as Miguel's wife, Danaree' joined the team to manage the office and work with customers before construction. When you contact Nola Construction, usually the first person you'll talk with is Danaree'.

## DIFFERENTIATORS

Commercial and residential Construction

Storm damage Repair

Pool Construction

Pool Maintenance

Outdoor Living
